

February 22, 2017

The clinic is very helpful for the Hartford community. It gives parents confidence that we can have our children cared for quickly and easily. We don't have to wait weeks to get into the clinic or take our kids out of school. We don't have to spend time in the ER. My son would be in the ER for his asthma all the time if not for the clinic. When his asthma gets bad, they can check him every day, several times a day. They can see my children and do follow ups without missing school. We would miss a lot more school and spend many days in the ER or end up admitted if not for the care in the school clinic.

The clinic is very important to us. Please don't take it from us.

Please let me know if I can give any more information or answer any other questions
